

As a skilled professional with over 6 years of experience in the industry, I appreciate the growth and development I have achieved throughout my career, starting as a customer support representative and advancing to a senior deployment engineer position. Throughout my career, I have demonstrated a strong ability to provide exceptional customer service, analyze and solve problems, and work with a variety of technologies.

In addition to my professional experience, I have also been actively involved in blockchain development for the past 2 years. During this time, I have developed a variety of smart contracts written in Solidity and deployed on the Binance Smart Chain (BSC). I have also integrated smart contracts with web3 and these contracts can be provided upon request. My non-commercial experience in blockchain development has greatly enhanced my technical skills, and I am excited to continue to explore and work in this field.

I am a proactive and dedicated professional with a strong technical background and a passion for learning. I am looking forward to exploring new opportunities and bringing my skills and experience to a dynamic and challenging environment.
